12. Methodological Notes for Any Future Use of This Archive

- When creating a new CV for a different purpose (e.g., applying for an engineering role instead of data entry), refer to the full "Work Experience" section here and select/highlight different experiences (such as the technical VRML and visual programming experience, or teaching).
- Approved (final) figures and dates are marked in bold or with the word "approved" in the table above; whenever two older sources conflict, the user's direct statement or the most recent official document always takes precedence.
- Do NOT include in any final CV: target salary details, health status (vision impairment), or religion — these are for internal archival purposes only unless the user explicitly requests otherwise.
- This file is meant to be continuously updated; it's recommended to add any new experience or document in a dedicated subsection below the timeline (Section 4), noting the date of addition.
